# Exclusive Contract Services

---

> Case Study

*Exclusive Contract Services provides top-class cleaning services to a range of businesses in the retail sector like supermarkets and distribution centres, as well as leisure providers including cinemas; education and commercial sectors. In this instance, Exclusive was tasked with cleaning the Development Centre of a leading supermarket chain.*

#### > EXCLUSIVE CONTRACT SERVICES

In cleaning this environment, Exclusive was required to clean diverse areas and surfaces, including:

- > General surface cleaning, particularly the cleaning of Formica walls
- > Cleaning tiles in bathroom areas
- > High level cleaning

For use on these varied surfaces, SYR's Multi Surface Tool was an effective solution. With a choice of high quality microfibre cleaning pads, the MST is designed to offer an exceptional cleaning performance, removing dust, dirt and even bacteria, with the need for minimal water or chemical usage. With cut-off coloured tabs on every cleaning pad, this tool could also be designated to colour-coded cleaning areas, reducing the risk of cross-contamination and providing a more hygiene cleaning experience for the different environments of the Development Centre.

## MST fits multiple handles

In addition to being usable as a handheld tool, the MST was also the solution for high-level cleaning across the business. Attachable via the SYR Interchange fitting, the tool can be used with a

choice of SYR handles, including the Studloc Pole, with telescopic action and extendable up to more than 15ft. Lightweight and ergonomic, this solution allowed operatives to clean safely even at very high levels, without too much strain being placed on the arms or shoulders.

Studloc Pole extendable up to 15ft

“It’s really handy – we have got Formica walls and it is ideal for them.

“We also use it for cleaning the high tiles in the toilets. We used to have to get a stepladder and clean from the top to the bottom, but now the cleaners can do the bottom tiles and I go in and use the MST at the top. Because it doesn’t leave water running down the tiles, it is ideal.”

**ALF GARDNER - SUPERVISOR, EXCLUSIVE**
