# Trafford General Hospital

---

> Case Study

Population  
**200,000**  
served

 **1450**  
staff members employed

*Trafford General Hospital is a district general hospital providing services to a population of over 200,000 in the borough of Trafford, Greater Manchester. It employs almost 1,450 staff.*

## > TRAFFORD GENERAL HOSPITAL

Due to the large size of the facility and the large volume of equipment needed to clean it, the hospital was experiencing a range of issues with the efficiency of their cleaning routines. There was a lack of adequate storage space, and large amounts of equipment frequently had to be moved around the busy corridors and wards of the hospital.

The hospital was also seeking an alternative to their existing microfibre cleaning system, as it was thought to be the cause of infection control issues that were persisting in the environment.

As a solution to the lack of storage space, the hospital selected SYR Space Saver trollies. These light, manoeuvrable and highly versatile trollies contain a number of features that made them suited to the busy environment, and made them the perfect solution to the hospital's storage problem.

> Space Savers are so named due to their ability to be folded down, the base trolley achieving the same footprint as the average mop bucket (51cm x 57cm), a much more compact storage option compared to a standard cleaner's trolley.

> Versatile and customisable, every Space Saver trolley can be fitted with a range of add-on equipment, including drawers and buckets, for extra storage space.

> Complete with tool and A-frame holders for storing of handles and safety signs, the trollies are ideal for keeping tools safe and secure during cleaning routines and for convenient storage when not in use.

> 84 litre waste/ storage bag

> The innovative design of the Space Saver allows buckets and mopping combos to be attached and wheeled alongside the main trolley. Not only does this eliminate the need for heavy buckets to be lifted on and off when in use, but it improves overall efficiency.

> Sturdy swivel castors give the trollies maximum mobility, ideal for the often busy, fast-paced hospital environment.

> Space Saver trollies are built with an easy-to-clean construction, ensuring they remain both hygiene and looking smart.
